

Ref: [redacted]  
Ser NT-0018-56

20 September 1956

MEMORANDUM FOR: Director of Naval Intelligence

ATTENTION : Captain B. E. Wiggin

SUBJECT : Request for Utilization of Intelligence Containing  
TALENT Material Outside TALENT Control System

REFERENCE : Your memorandum dated 29 August 1956

1. Approval was granted to your request per referenced memorandum at the meeting of the Utilization Advisory Board held 12 September 1956.

2. For your information, the minutes covering that part of the meeting are quoted:

"Although the Board approved the proposal in principle, it was the consensus of the Board that each Agency should, insofar as practicable, handle the blending of TALENT materials with other intelligence information within the TALENT system so that finished intelligence incorporating TALENT material would in general be a composite of so much other material as to minimize the chance of non-cleared personnel deducing the TALENT ingredient. Consequently the Navy undertook to limit the application of its proposal to ports as to which there exist a reasonable quantity of intelligence information from other than TALENT sources."

3. Enclosures forwarded with reference memorandum are returned herewith as you requested.
